

Government Regulation Lab (team)

1. What are the primary sources of U.S. government revenue?
2. What are the largest expenditures of the government?
3. List the tasks you (your group) think it should perform.
4. List the tasks it is currently doing that you think it is doing poorly or should not perform.

Note: Your team may choose a different country, but it is probably easiest to find data for the U.S. government.
